BREEDING BULLS FOR ALL BUDGETS

2021 Sale Breakdown of Poplar Meadows and Blast Angus Bulls

19 bulls sold	\$4000 and under
28 bulls sold.....	\$4001 to \$4999
28 bulls sold	\$5000 to \$6999
11 bulls.....	\$7000 to \$9000
2 bulls.....	\$9000 and up

POPLAR MEADOWS HERD HEALTH

All our calves are vaccinated in the spring (April-May) with Ultrabac 7 Somubac and Pyramid FP5 + Presponse and a second vaccination in the fall prior to weaning (Sept or Oct). Live virus vaccine. Our entire cowherd receives prebreeding vaccination of Express FP 5 yearly and every 2 years Ultrabac 7 Somubac. Entire herd is treated with Ivermectin yearly, usually bulls will be done twice a year. We are proud to belong and follow the VBP+ program. We feel strong about maintaining herd health for our protection and yours.

OBI LIVESTOCK LTD.

Welcome

Welcome to the Northern Alliance Bull Sale. I am very proud to be associated with Tanya and Lia and their families.

Poplar Meadows and Blast Angus continue to be leaders in the Angus industry with making decisions that benefit their cow herds. A strong set of herdbulls are used and you can tell with the consistency in the bulls offered. They also use A.I. bulls that have selected and have a strong ET program to enhance the marketability of their animals.

The cow herd is the key to these operations, as many of you know that have been through them. A very uniform set of brood matrons are the backbone. This past fall Poplar Meadows had a very successful bred heifer sale that exceeded expectations. A testament to the cow herd as females sold all across Canada. A program that continues to rise to the top each and every year.

The bulls again are fed to perfection in large pens with longevity in mind, very athletic bulls that will get out and work for you. One of the best attributes to this sale is how well the bulls breed for the new owners. This comes back to how they are managed.

I am very familiar with these programs and if I can assist you in any way in your selections, please do not hesitate to call me.

 *Mark Holowaychuk*

HOW TO

Find Us

Welcome

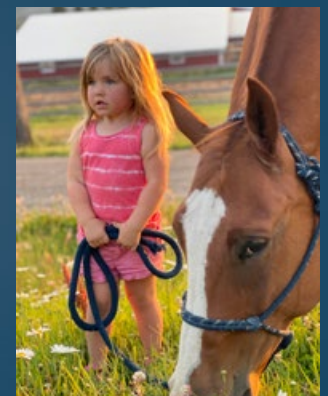

We would like to welcome you to our 12th annual Northern Alliance Bull Sale.

We have seen big changes in our industry in the last few years as our margins have become smaller and smaller. As a seedstock producer we have tried to create a more efficient cow. We strive to have deep-bodied, moderate, easy fleshing cows who have the ability to function with minimal inputs. In other words efficient. The biggest favour you can do for yourself is select bulls with attributes to boost your bottom line. We have bulls that are calving ease, bulls to increase weaning weights and also have carcass quality that enables yourself or the feedlot who buys your calves to get paid premiums. Not all bulls are created the same. We have been sending our commercial and purebred steers to Alberta to finish and sell on the grid. We have consistently been paid premiums on those carcasses. Our cattle are accustomed to foraging in the bush, looking for water and climbing hills. The bulls we sell have been fed a Total Mixed Ration with a 3 lb a day gain goal. They run in large pens and receive plenty of exercise. Bulls will have passed a semen test and be ready to go to work. We stand behind our bulls and have a large pen of bulls always available if something was to arise. We have sold on average 95-120 bulls a year and have 2% or less replaced. So you can be assured your not bidding against credit money.

We would like to thank Kelly Wall and Michael Urquart for all your help this past year on the Fort Fraser location. Big thanks to Charly & Lucille Belsham for their continued support and help. Having Taylor and Alaina living up north again near us as been awesome. I'm pretty sure Alaina and my granddaughters will love the cows as much as I do. Being a Grandparent has fast become our favourite occupation. This past summer Taylor and Alaina have taken on the role of full time ranchers. Also a big thank you to Olaf Halvorson for always giving us a hand at the drop of a hat.

We have done ultrasounds on all the bulls and will have results shortly. Videos will be available on DLMS.ca closer to sale and remember to register to bid online with them as well. Several bulls have had genomic tests done and if you check on CAA many of our bulls will have higher EPD accuracies. If that's information you would like please let me know. Please join us anytime between now and our sale at Fort Fraser Ranch sale and peruse the bulls.

We are passionate about being a seedstock producer and I hope you understand our commitment to BC and to producing quality bulls with real world attributes.

A $\frac{3}{4}$ brother to 5J and with similar great calving ease direct and birthweight epds. 10J has a gorgeous dam who is moderate in her make up, perfect udder, loads of hair and tremendous feet. This bull is very smooth made and would make a heifer bull in the best of herds. This would be a great pair to take on a group of heifers and keep them all looking similar. He is also Angus GS tested and higher accuracy EPD's.

South Point heifer bull off a first time calving Executive Decision daughter. His sire was the Agribition and Denver Champion bull. This bull has tons of shape and will give you calves with lots of grow. 5J indexed 105 at weaning. His calving ease direct epd is in the top 1% of the breed and his birthweight is in the top 3%. He is Angus GS tested and his epds show a greater accuracy than most because of it.

The first of another new sire group. Greenwood Gunslinger was purchased in the spring of 2020 by CMT Farms and we were happy to jump on board to purchase semen on him. Gunslinger has an outstanding dam as well as sire. The No Doubts seem to be on fire across Canada and the USA. This is a unique pedigree with only 14 Kessler Frontman's registered in Canada. A maternal brother is owned by Gar Garton and Mystic Mountain Angus. Angus GS tested.

The first of our Turning Heads sons. I first saw this sire as a calf in Denver and fell in love with him. When the opportunity to buy semen on him I jumped at the chance. This bull has exceptional growth with over 800 lb 205 day weight and ranked 2/19. His dam is 12 and calved first cycle again. Her sons have sold to Pat Lannon, DMS Ranch, Wineglass Ranch, Carpenter Mountain Ranch and a daughter to Jaycee Dutchik. Purebred guys have a look. Angus GS tested.

This is 1 of 4 full brothers in the sale. I sold embryo's to Coleman Angus in Montana and a full brother of these bulls recently sold for \$16,000. The dam Blossom 124A is also the mother to Executive Decision. 124A has a natural calf currently on her sired by SAV Bloodline which is a standout. Angus GS tested.

This would be the number 1 weaning bull of the entire calf crop. His 205 day weight of 916 is definitely impressive. He is a March calf and I'm thinking he will be close to 1500 lbs sale day. This is my first calf crop out of the Profound bull and they definitely have lots of performance and great foot quality. Angus GS tested.

This bull is the only bull in sale that we are still waiting on DNA to confirm his sire. We have pulled DNA on every calf for the last several years. This year we are taking tissue samples when we tag at birth. If someone ever has an issue with calves and we need to verify which sire is the culprit it makes it easy to identify. Another reason is there is a big difference if a sire has a 75 lb birthweight or a 95 lb and your using on heifers. I believe in being proactive instead reactive. Dam is a big sided easy fleshing cow.

Dam of this bull is a powerhouse. She has produced sons to the Fitchett Famil, Carpenter Mountain Ranch and a feature bred heifer this past fall to Trecha Cattle. Lots of power in this guy and would use in the cow pasture. We purchased the dam from our friends Robyn and Trent of Dragon View Angus. Sire Verified.

Dam is an eleven year old cow we purchased from Chuck and Diane from Mountain Ash Angus as a calf. I think the world of Diane as she reminds me so much of my Dad and all the special angus events we went to as kids. Dam has been an extremely good producing cow. Sire Verified.

Lot 282J

THANK YOU

*To Kristin Bell for your
help with night checks!*

BLAST Angus

We wish to welcome you
to the 2022 Northern Alliance Bull Sale!

Thank you to Tanya and Monty for hosting the sale again. It's pretty cool to get to sell bulls with your best friend and sister!! Our parents started raising black angus in 1965, and Tanya and I are very proud to be carrying on that tradition!

We have worked very hard over the last 24 years to build a strong maternal herd with sound functional females that require very little input, whether that be feed or manpower. We do not creep feed our calves. We expect our cows and the environment to bring in heavy profitable calves in the fall. Our cows are deep, thick and easy fleshing. We have carefully selected herd sires from across Canada that will complement our cow herd. Due to some health issues we sold 30 cows last year so are calving 85 head this year- 2/3 are registered angus and 1/3 are commercial blacks, baldies and Herefords.

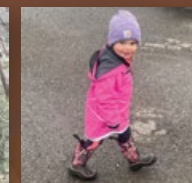

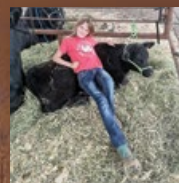

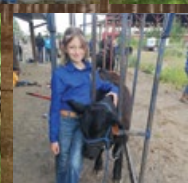

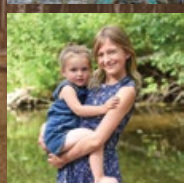

We are huge 4-H supporters and were proud to have bred the 2021 Topley 4-H grand champion female (she was also the dam of the champion steer!), reserve champion female as well as top 2 year old, and top bred heifer. We sold 13 animals to 4-H members last fall and are excited to see how they will do this year with their purchases! Our grand daughter, Taylor, once again made us proud and did very well at the 4-H show! She will have her cow, Apple Jack and her 2022 calf as well as Bambi,

Apple Jack's 2021 heifer, to show this year! She will be busy! Addie loves cows already too! I am hoping I can get her to show something by the time she is 3!!! She is great help already with feeding as she likes taking the strings off the bales!

We are proud of the group of bulls we are selling this year! We feel this is the strongest set we have ever raised! Thank you to all our supporters, bidders and buyers in 2021!

We welcome you to come view the bulls, dams and sisters anytime. We are located 2.5 km off the highway.

I would be happy to help you make selections if you are not able to attend the sale. Your satisfaction is guaranteed. Please contact me ahead of the sale. My cell number is 1-250-845-1147.

- Impressive thickness and breed character! Powerful bull!
- Sired by our Peak Dot No Doubt 25D bull who we, unfortunately, lost in the fall of 2020, so these are his last bulls.
- Dam is a larger framed Border Butte Fundamental 105B cow. This cow family tends to have larger calves.
- Maternal sister in the herd.
- This bull will produce some big steer calves!
- Angus GS tested and sire verified

*Lot B 9J*

**Lot B 10J**

- 10J is a powerhouse! Deep bodied, stout, big topped, big scrotal and has an awesome disposition!
- Dam is 14 and looks 5! She is a never miss cow who really should be flushed! She has a tremendous calf every year no matter what she is bred to! She is a front pasture kind of cow. Her udder is still impeccable!
- 88 lb bw, 773 lb 205 Milk EPD is in the top 1% for the breed.
- Our high seller last year to Poplar Meadows was a maternal brother. 10J is th 8th bull out of 20U to sell through the sale. Maternal brothers to Breed Creek Angus, Mountain Ash Angus, Chilancoh Ranch, Clarence Friesen, 2 to Dirk Vandermeer.
- Full sister raised one of the best heifer calves last year as a 2 year old, perfect uddered, very feminine.
- Angus GS tested and parent verified.

- A stretchy, smooth made, deep sided bull out of another new herd sire, Peak Dot Attractive 236G
- Game Day dam would be one of the most easy fleshing cows we have.
- maternal sister in the herd, brothers to Joanne Cook, Heath & Debbie Walton, 6S Family Farm.
- 70 lb bw, -0.3 birth EPD + 12 maternal calving ease, dam had another 70 lb bull calf this year.
- Calving ease bull.
- Angus GS tested and parent verified.

Lot B 20J

- Another Encore son who has been one of my favourites since he was a calf.
- Stout, hairy, easy fleshing, correct made, free moving bull.
- EPDS - -0.1 bw (top 10% for the breed), +19 maternal calving ease (top 1% for the breed) Calving ease built in to this guy!
- Dam is a young Border Butte Fundamental 105B cow. As I do these foot notes I see how many dams of the bulls are out of the Fundamental bull. He was a true calving ease sire and sired very phenotypically correct bulls/heifers. We sold him to Eastondale Angus in Saskatchewan.
- Full brother sold to Chezacut Ranch last year.
- Angus GS tested and sire verified

- Angus GS tested, sire verified.

A WORD ABOUT BIRTHWEIGHTS

Angus Bulls have long been known for their paramount calving ease. If you are breeding heifers, Angus is the go-to breed of choice. But what about the so-called “big” birth weight Angus bulls - where do they fit in? The vast majority of mature cows calve unassisted - it is pretty rare for a mature cow to need assistance, except for abnormal deliveries (backwards, breech, twins, and ECT.). Data reported to the AAA shows that 99% of Angus cows, second calf or beyond, calves unassisted and only 1% need some type of assistance (abnormal deliveries excluded from this data).

Back to the question at hand: where does the “big” birth weight Angus bulls fit in? Example if you have a bull with a Birth EPD of +5, he would be 3.2 pound heavier than the average (breed average BW EPD 1.8) ($5 - 1.8 = 3.2$ pounds difference). However, his superior growth EPDs mean he will wean bigger calves and put way more money in your pocket than the average Angus bull! The moral of the story: If you are breeding mature cows to an Angus bull, don't make birth weight be your focus.

Wrote and printed with permission from Koupal Angus

GLOSSARY OF TERMS

Expected Progeny Difference (EPD):

Is the prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the database. EPDs are expressed in units of measure for the trait, plus or minus. Interim EPDs may appear on young animals when their performance has yet to be incorporated into the American Angus Association National Cattle Evaluation (NCE) procedures. This EPD will be preceded by an “I”, and may or may not include the animal's own performance record for a particular trait, depending on its availability, appropriate contemporary grouping, or data edits needed for NCE.

Birth Weight EPD (BW):

Expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

Weaning Weight EPD (WW):

Expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

Yearling Weight EPD (YW):

Expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

Maternal Milk EPD (Milk):

Is a predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.

Calving Ease Direct (CED):

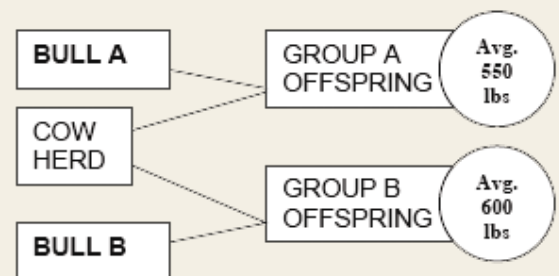

Is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

Calving Ease Maternal (CEM):

Is expressed as a difference in percentage of unassisted births with a higher value indicating greater calving ease in first-calf daughters. It predicts the average ease with which a sire's daughters will calve as first-calf heifers when compared to daughters of other sires.

How Do I Use EPDs?

Imagine you are interested in purchasing a couple of bulls for your herd. You are looking at the EPDs in a sale catalogue. Bull A has a weaning weight (WW) EPD of +10 and Bull B has a WW of +60. What does that mean? How can you use those EPDs to choose between the two bulls? If these animals were randomly mated with 10 similar cows, we would expect the group average weaning weight of Bull A's offspring to be 50 lbs lighter than that of Bull B's ($60 - 10 = 50$). So, if you were interested in producing heavier calves, Bull B would be the one to choose. Remember, EPDs evaluate group average and offspring's performance. They cannot predict individual performance or weights.

Average Black EPDs	BW	WW	YW	Milk	TM	CE	MCE
	+2.1	+45	+80	+21	+43	+3.5	+6.6
